Synzen's Statement on REACH Provisions

This statement reflects Synzen's understanding of the applicability of European Union Regulation (EC) No. 1907/2006 of the European Parliament and of the Council of 18 December 2006, concerning the Registration, Evaluation, Authorization, and Restriction of Chemicals (REACH) to Synzen's products. This statement addresses pre-registration, notification of Substances of Very High Concern (SVHC), and disclosure of information as required by REACH. Actions taken by Synzen to ensure REACH compliance are also discussed.

It is Synzen's understanding that there are currently no REACH requirements that apply to Synzen's products. Synzen's products are articles as defined in REACH Article 3(3). There is no intended release of substances from Synzen's products under normal or reasonably foreseeable conditions of use. Therefore, the requirement in REACH Article 7(1)(b) to register substances contained in articles and intended to be released under normal or reasonably foreseeable conditions of use does not apply.

Synzen does not sell chemicals, as defined by REACH, to our customers. According to the REACH directive Section 3, no 3, laminates used in Synzen's product as sold to our customers, are considered articles that do not require registration. REACH Section 3, no 3 defines a product Article as a product which during the fabrication process obtains a specific form, surface, or build which is more important to the customer application (Multi-Layer production process) than the chemical structure for this function.

As of 4 February 2026, to the best of its knowledge, Synzen certifies that none of its products contain any of the 253 substances on the REACH Candidate List at a concentration $\geq 0.1\%$ (w/w). Synzen will continue to monitor and assess new SVHC additions to ensure ongoing compliance with REACH regulations. Synzen is committed to ensuring environmental compliance globally and will continue to stay informed of changes to the REACH directive and comply as necessary.

Synzen remains committed to global environmental compliance and will continue to stay informed of any updates to the REACH directive. In the event of any regulatory changes affecting our products, Synzen will take the necessary steps to maintain compliance and keep customers informed.

More information about REACH can be found on the ECHA website, including a guidance document on articles:
